OFFICIAL NOTICE OF PRODUCTION SUSPENSION

Subject: *Suspension of Production Scheduling and Shipping Arrangement for the Mozambique Order*

To	Mr. Carlos
Company	Ecosys Energias Renováveis, Lda.
Project	Solar Street Light Order – Mozambique
Destination Port	Nacala, Mozambique
Date	14 July 2026
Reference	RS-IB-2026-0714-MZ

Dear Carlos,

This letter serves as an **official notice** regarding the current status of the above-mentioned solar street light order.

Following your initial payment of **ZAR 200,000**, RoadSmart arranged and prepared the relevant battery raw materials specifically for this project. However, the required subsequent deposit has not yet been received, and no confirmed payment date or executable payment plan has been provided.

Although we understand that you are currently waiting for payments from your side, the factory cannot continue reserving production capacity, manpower and supply-chain resources for an indefinite period without a confirmed production instruction.

Therefore, effective from the date of this notice:

1. Production scheduling has been officially suspended

The order has been removed from the factory's active and confirmed production schedule.

No production completion date, inspection date or delivery date is currently reserved or guaranteed.

2. The previous production and delivery timeline is no longer valid

Any production schedule, delivery commitment or estimated completion date previously discussed shall be considered cancelled and will need to be recalculated once the order is reactivated.

3. Shipping schedules to Nacala will no longer be actively monitored or reserved

As the production schedule has been suspended, our team will no longer allocate time and resources to continuously monitor vessel schedules, freight rates, container availability or booking deadlines for shipments to **Nacala Port, Mozambique**.

Any previously discussed sailing schedule, estimated freight cost or shipping arrangement is therefore no longer guaranteed.

4. Freight costs and shipping availability will be reconfirmed later

Ocean freight rates and vessel availability are subject to market changes. When the order is ready to restart, the freight cost, sailing schedule, transit time and container arrangement must all be checked again based on the actual market conditions at that time.

5. Conditions for restarting the order

The order can only return to production planning after we receive:

- A confirmed payment arrangement;
- The required subsequent deposit;
- A clear production instruction;
- Reconfirmation of factory capacity and raw material availability.

Once these conditions are fulfilled, RoadSmart will issue a new production and shipment schedule.

Please note that this notice **does not constitute a cancellation of the order**. The battery raw materials already prepared under the project will remain recorded against your order. However, the previous production priority, delivery timeline, freight rate and sailing schedule can no longer be retained.

We sincerely value our long-term cooperation and remain willing to support the project once a clear and executable payment plan is available. At the same time, we must manage our factory capacity responsibly and prioritize orders with confirmed payments and production instructions.

Please acknowledge receipt of this official notice.

Sincerely,

RoadSmart
